

CLOUD AND DEVOPS ENGINEER

Akhil Kuragayala

CURRICULUM VITAE

PROFESSIONAL SUMMARY

IT professional with 4+ years of enterprise Pega development and production support experience, transitioning into cloud and DevOps. Hands-on work includes AWS EKS, Terraform, GitHub Actions, Argo CD, Jenkins and Azure three-tier infrastructure. Experienced in REST integrations, incident troubleshooting and Agile delivery.

EXPERIENCE

Technical Associate

Evoke Technologies | Apr 2021 – Jul 2025

• Developed Pega PRPC workflow applications for oil and gas clients, including Service REST and Connect REST integrations.

• Automated business processes with Pega rules and job schedulers; clarified requirements and supported release validation.

• Investigated production issues, resolved defects, supported UAT and worked with Agile teams on application delivery.

PROJECTS

BoundaryPass Cricket Booking on AWS EKS | Completed | FastAPI, Python, Terraform, EKS, GitHub Actions, Argo CD

• Built a cricket booking application; tested health checks, seeded matches, stock reduction and overbooking prevention with pytest.

• Created modular VPC and EKS infrastructure and CI checks with SonarQube Cloud, Gitleaks and Trivy; used Kubernetes manifests and Argo CD for delivery. Completed documentation and resource teardown to control costs.

Azure Three Tier Architecture | Completed | VMs, VNet, NSGs, Bastion, Nginx, Tomcat, MySQL

• Configured web, application and database tiers with private connectivity and NSG rules controlling traffic between tiers. Troubleshot outbound package installation and documented deployment steps, screenshots and architecture.

Amazon EKS GitOps Delivery Pipeline | Completed | GitHub Actions, Docker, Trivy, SonarQube, Argo CD

• Built and tested a Java application with Maven, analyzed code with SonarQube, scanned images with Trivy and pushed versioned images to Docker Hub.

• Automated manifest updates and Argo CD synchronization to EKS; verified two healthy replicas and a live application change through an AWS LoadBalancer.

AWS Three Tier Infrastructure Automation | Completed | Terraform, Jenkins, AWS

• Created reusable modules for VPC networking, routes, security groups, IAM instance profiles and public/internal NLBs; configured encrypted, versioned S3 state. Built a Jenkins Terraform pipeline and verified networking, load balancers and instance role access.

Terraform AWS Infrastructure Project | Hands-on | VPC, EC2, ALB, NAT Gateway

• Provisioned subnets, gateways, routes, security groups, bastion EC2 and an ALB; tested application connectivity across instances.

Serverless Booking Application | Completed | S3, API Gateway, Lambda, DynamoDB

• Connected an S3-hosted booking page to an HTTP API and Node.js Lambda storing requests in DynamoDB; configured CORS and IAM write permissions and verified the workflow.

Private Database and Network Connectivity Labs | Hands-on | EC2, RDS MySQL, security groups

• Configured Windows EC2 access to private RDS MySQL; practiced tier isolation with subnet routing and security group rules.

EDUCATION

M.S. Computer Networking — Australia
Dec 2020

B.Tech Computer Science and Engineering — Hyderabad
May 2018

SKILLS

Cloud and IaC

AWS VPC, EC2, IAM, S3, RDS, ELB, NAT Gateway, Route 53, Lambda, API Gateway, DynamoDB, EKS, Terraform; Azure VNet, VMs, NSGs, Bastion

DevOps and Security

Git, GitHub Actions, Jenkins, Docker, Kubernetes, Argo CD, SonarQube, Gitleaks, Trivy

Systems and Observability

Linux, Bash, CloudWatch, Prometheus, Grafana, networking, security groups

Applications and Data

Pega PRPC, REST APIs, FastAPI, Python, Maven, MySQL; MERN stack training

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals

AWS Certified Cloud Practitioner

Pega Certified System Architect (CSA)

Pega Certified Senior System Architect (CSSA)

TRAINING

Multi-Cloud DevSecOps with Generative AI

V Cube Software Solutions
May 2026 – present

MERN Stack Development

Tech U
Sep 2025 – Mar 2026

INTERESTS

Playing and watching cricket
